Format: /wfh {cmd} -date [yyyy/mm/dd] -time [H:i] -msg [string]

List command availables:
・ start
・ rest
・ rest_end
・ task [id]
・ task_end [id]
・ end
・ workout [mins]

Optional parameter:
・ -date
・ -time
・ -msg
・ -complete_time.

Example:

/wfh task 111 -date 2020/04/01 -time 14:30 -msg print Hello World

1. Start new working day

/wfh start

/wfh start -msg Good morning!

/wfh start -date 2020/04/10 -time 08:00

When you type the Slack command, current time will be saved to Google Spreadsheet. But if you don't want to update it with "current time", you can use parameter -date and -time instead.

2. Take some rest

/wfh rest -msg I have lunch now!

3. Come back to work

/wfh rest_end

4. Start new task

/wfh task 123 -msg fix issue #475

/wfh task 148 -date 2020/04/06 -time 11:00

Task id is required

5. When task finish

/wfh task_end 123 -msg pr #775

/wfh task_end 148 -date 2020/04/08 -time 09:00

/wfh task_end 114 -date 2020/04/07 -time 10:00 -complete_time 9H

Task id is required

6. End of a working day

/wfh end

/wfh end -msg I finished today's work now!

7. Exercises

// Work out for 3 minutes with a plank.
/wfh workout 3 -msg plank!
